Contents for Probability: Discrete Random Variables

Random Variables

- Random Variables Defined
- Random Variables: Count vs. Measure

Discrete Random Variables

- Discrete Random Variables Introduction
- Probability Distribution Defined
- Probability Distribution: Table of Outcomes
- Probability Distribution: Probability Histograms
- Probability Distribution: Applications
- Learn By Doing Activity
- Probability Distribution: Using Conditional Probabilities

Mean and Variance

- Mean and Variance of a Random Variable: Introduction
- Mean of a Random Variable: Applications
- Mean of a Random Variable: Examples
- Variance and Standard Deviation of a Random Variable
- Standard Deviation of a Random Variable: Examples

Rules for Means and Variances

- Rules for Means and Variances of a Random Variable: Add, Subtract, Multiply by a Constant
- Rules for Means and Variances of a Random Variable: Linear Transformation
- Rules for Means and Variances of a Random Variable: Sum of Two Variables

Binomial Random Variables

- Binomial Random Variables: Introduction
- Binomial Random Variables: Probability Distribution
- Binomial Random Variables: Probability Distribution Examples
- Binomial Random Variables: Mean and Standard Deviation
