Case $Q \rightarrow Q$

Case $Q \rightarrow Q$: Two Quantitative Variables

Here again is the role-type classification table for framing our discussion about the relationship between two variables:

		Response	
		Categorical	Quantitative
Explanatory	Categorical	✓ $C \rightarrow C$	✓ $C \rightarrow Q$
	Quantitative	$Q \rightarrow C$	$Q \rightarrow Q$

We are done with cases $C \rightarrow Q$ and $C \rightarrow C$, and now we will move on to case $Q \rightarrow Q$, where we examine the relationship between two quantitative variables.
